InterSCInet's first laboratory application

What is *SCiCart*?

SCiCart is an online database designed to facilitate the ordering of laboratory supplies and equipment.

What can *SCiCart* do for your group?

- Create and maintain a personalized laboratory ordering list
- Track both grant and user expenditures on supplies and equipment with reports that can be viewed, printed or exported into a spreadsheet file
- Save time when placing and tracking orders
- Communicate quickly and easily through an integrated e-mail system

It's Simple!

- When an item needs ordering a user logs in, selects the item and relevant information (e.g. grant, quantity, etc.) then submits the request
- SCiCart then sends an email alert to your laboratory's designated purchasing agent informing them of the requested item
- Your purchasing agent enters SCiCart and retrieves item and vendor details needed to place the order

Additional Features

- Customize items, item categories, quotes, vendors and much more
- Prioritize orders for the designated purchasing agent
- Once an item is entered, never search for its catalogue number again
- Change application users quickly and easily to adapt to changing personnel

Register Your Laboratory, Group or Project Today!

To sign up, first register for FREE with InterSCInet by going to:
www.InterSCInet.com
